Read the entire user guide carefully before using the table. The user guide should always accompany the table.

Paul Leroy

Paul Leroy (1960) has a degree in architecture, furniture design, graphic design and industrial design from the Royal Danish Academy of Fine Arts School of Architecture. Leroy has also been an apprentice under Professor Tage Luneborg.

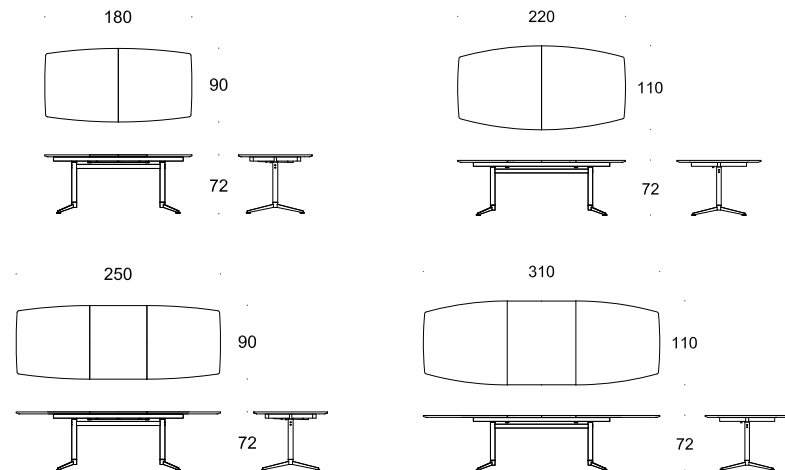

When he finished his studies he opened his own architectural studio in 1987, and the following year Paustian launched Leroy's Coffee Table. Since then, several design gems such as the Spinal series have followed in its wake.

Paul Leroy's clientele is both broad and internationally based, and includes Norman Foster, Foster and Partners, Daimler Chrysler, Telenor, Egmont, Copenhagen Airports and Arthur Andersen.

Paustian Spinal Table extension

The Paustian Spinal Table with extension, designed by Paul Leroy, was launched in 2010. It is, due to its light simplistic design, a perfect choice for the home and office. The Spinal Table with extension is characterized by functionality and ease of use. The table has a synchronized pull-out system that allows an effortless one-person operation and its frame design makes room for numerous chairs without the inconvenience of bothersome table legs.

The table top is a 25 mm MDF panel with a laminate finish. The table top frame comes always in black painted steel. The base is supplied in matt chrome steel with integrated adjustable feet. Besides matt chrome steel, the columns are available with powder lacquer black (RAL 9011 gloss 20).

The Spinal Table is available in the following variants:

- white laminate with black painted edges
- white dyed laminate with white painted edges
- black linoleum with black painted edges
- natural oak veneer with pewter linoleum leaves and matching painted edges
- smoked oak veneer with black linoleum leaves and matching painted edges

The Paustian Spinal extensiontable comes in two sizes and shapes:

Boat shape:

Length: 180 - 250 cm

Depth: 90 cm

Height: 72 cm

Length: 220-310 cm

Depth: 110 cm

Height: 72 cm Height: 72 cm

Rectangular:

Length: 180 - 250 cm

Depth: 90 cm

Height: 72 cm

Length: 220 - 310 cm

Depth: 110 cm

Height: 72 cm

C Spirit Level

Spinal Table extension

- 1 Place the frame on an even floor surface, make sure that the frame is in level.

- 2 The frame legs are fitted with adjustable feet that can be adjusted in height to ensure the frame is level when placed on an uneven surface.

Spinal Table extension

- 3 The extension leaves are placed in the middle of the table top

- 4 Place the table top panels on top of the frame, so that the table top bushings are above the screw holes in the frame. Make sure that the brass dowels/brass holes from the table top panels match the brass dowels/brass holes on the extension leaves.

Spinal Table extension

- 5 Insert all screws 'A' in the underside of the frame and screw them up into the table top bushings so that they catch hold, but without tightening them.

Spinal Table extension

- 6 Gently pull the table top panels apart until the extension reaches its full length and stops. Draw the extension leaves up into same horizontal position as the table top panels.

Spinal Table extension

- 7 Gently push the end of the table so that the table top panels and extension leaves meet, and the brass dowels enter the brass holes.

- 8 Push the end of the table so that the panels fit tight.

Spinal Table extension

- 9 Now tighten the screws 'A' on the underside of the frame, so that the table top panels are fastened firmly to the frame, and the table is ready for use.

Spinal Table extension

- 10 When moving the table do NOT lift it by its table top panels. Pull the table top panels apart and lift by gripping the frame in the middle of the table. When you move the table, remember to regulate the adjustable feet on the frame, so that the table is in level again.

Maintenance

The chrome frame may be wiped with a dry or damp cloth. If a damp cloth is used, the frame should subsequently be dried with a dry cloth.

Stubborn stains on the table top may be removed using a cloth wrung in lukewarm water. If this fails to remove the stain, a universal cleaning fluid in a light solution may be used, or washing-up liquid.

After cleaning, the table top should be wiped off with a cloth wrung in clean water, then dried with a dry cloth.

DO NOT place any hot or cold liquids directly on veneered or solid wood table tops. Always use a coaster or a trivet. Directly contact with hot or cold liquids will damage the wooden surface and leave stains or splotches. Especially on dark wooden surfaces. Hot stearin or wax can leave same stains or splotches.

Disposal

For disposal/destruction, the table must be broken down into the following parts: the table top may be disposed of as combustible material. The metal frame is disposed of as recyclable metal.

The frame may be separated from the table top and recycled. The table top can be sent for incineration.

Guarantee

Standard products are guaranteed for two years against manufacturing defects in the materials or construction. Wear or damages to the product are not covered by this guarantee. All dimensions are approximate.

The table has been tested according to EN 15372: 2008
